PROFESSIONAL SUMMARY

Aspiring Software Engineer graduating in 2026 with hands-on experience in Java backend development, Spring Boot REST APIs, full stack web applications, DevOps workflows, and cloud fundamentals. Skilled in Java, React.js, MySQL, Docker, CI/CD, AWS, Azure, OCI, and AI API integration. Interested in building scalable backend systems, cloud-ready applications, automation-driven deployment workflows, and clean software solutions.

EDUCATION

- **Koneru Lakshmaiah Education Foundation (KL University)**, Vijayawada
Bachelor of Technology in Computer Science Engineering **2022–2026**
CGPA: **8.9 / 10**
- **Narayana Junior College**, Vijayawada – Intermediate (MPC) **2020–2022**
Percentage: **79%**
- **St. Theresa's English Medium High School** **2020**

TECHNICAL SKILLS

- **Programming Languages:** Java, C, SQL
- **Backend Development:** Spring Boot, REST APIs, Microservices Basics
- **Frontend Development:** React.js, HTML5, CSS3, Responsive UI Development
- **Databases:** MySQL, Database Design, Query Optimization Basics
- **DevOps and Cloud:** Git, GitHub, Docker, Jenkins Basics, GitHub Actions, CI/CD, AWS, Microsoft Azure
- **CS Fundamentals and Tools:** Data Structures and Algorithms, OOP, Collections Framework, Exception Handling, JUnit 5, Postman, Firebase, Maven Basics

INTERNSHIP EXPERIENCE

DevOps Intern – Swecha Foundation (APSCHE Collaboration) **Jun 2024 – Aug 2024**

Free and Open Source Software Educational Applications

- Assisted in CI/CD workflow implementation and deployment validation for open-source educational web applications.
- Used Git and GitHub for version control, collaboration, branching, and project workflow management.
- Worked with Docker basics, deployment monitoring, release documentation, and operational procedure improvements.
- Collaborated with development teams to improve release readiness, documentation clarity, and deployment tracking.

Cloud Computing Intern – Teachnook, Cognizance'24 IIT Roorkee **Jan 2024 – Feb 2024**

Certificate ID: TNINTC24-1217

- Gained exposure to cloud deployment, application testing, backend connectivity, access management, and infrastructure documentation.
- Learned cloud service configuration, application management, deployment workflows, and cloud operations fundamentals.
- Worked on basic cloud environment setup, configuration validation, and application support tasks.

PROJECTS

Constitution Awareness Platform **2025**

- Built a full stack civic-learning platform covering Fundamental Rights, Fundamental Duties, democracy, governance, quizzes, surveys, and analytics.
- Designed backend API structure with controller, service, repository, and database-driven workflows for structured application development.
- Created interactive pages including explorer modules, survey forms, dashboard views, chatbot-style guidance, and responsive sections.

Object-Oriented Design Quality Dashboard **2025 - 2026**

- Developed a dashboard to analyze OOD metrics including WMC, RFC, CBO, LCOM, and DIT for software maintainability assessment.
- Designed automated metric evaluation, quality grading, project analysis, and structured report generation workflows.
- Created maintainability-focused analysis features to help developers identify high-complexity classes and weak design areas.

AI-Based Legal Aid Platform **2025**

- Developed an AI-powered legal assistance platform for user queries, category detection, guided support, and role-based access.
- Implemented authentication and real-time data workflows for managing users, saved items, and platform information.
- Built responsive frontend screens for clients, lawyers, and law students with role-based navigation and clean UI flows.

Hotel Booking Voice Bot **2024**

- Designed a voice-based hotel booking assistant with conversational flows, booking validation, slot filling, and response handling.
- Gained practical understanding of serverless architecture, event-driven execution, and managed cloud database integration.

Online Ticket Booking System **2024**

- Developed a full stack ticket booking application with user-facing booking flows, backend APIs, and database-driven operations.
- Implemented core modules for user management, booking records, availability handling, and transaction-style data updates.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Salesforce AI Associate
- Data Structures and Backend with Java – Coursera
- Power BI Workshop – OfficeMaster
- Finalist – Hackera Hackathon 2025
- Certificate of Presentation – CIET-2026

RESEARCH AND ACADEMIC WORK

- **Research Paper: Intelligent Dashboard for Object-Oriented Design Quality Analysis and AI-Powered Suggestions** **2025–2026**
 - Focused on improving software maintainability through OOD metric evaluation, quality grading, and refactoring recommendations.
 - Prepared presentation material and demonstrated the tool at the International Conference on Cognitive Informatics Engineering and Technology.
 - Explored how object-oriented metrics can support early detection of design issues and improve code maintainability.

LEADERSHIP & ACTIVITIES

- **Head of Design & Mentor – KL Radio** **2023–2025**
 - Designed digital posters, branding assets, event creatives, and social media content using Canva and Adobe Photoshop.
 - Mentored student teams in digital media, branding consistency, content design, and audience engagement.
 - Collaborated with club members to maintain visual consistency across campaigns, event promotions, and student engagement activities.

LANGUAGES

- English – Fluent
- Telugu – Fluent
- Hindi – Conversational
- Japanese – Elementary Proficiency, JLPT N4 Preparation

KEY STRENGTHS

- Backend development using Java, Spring Boot, REST APIs, database workflows, and clean service-layer architecture
- DevOps mindset with exposure to Git, GitHub, Docker, CI/CD fundamentals, deployment validation, and documentation
- Full stack development using React.js, backend API integration, database operations, and responsive UI design
- AI integration using prompt-based workflows, API integration, structured responses, and user-focused application features
- Quick learner with project ownership, debugging ability, teamwork, communication skills, and continuous improvement mindset
